HOSPITAL TO HOME

VOCSN

VENTILATION

Critical Care Ventilator

VOCSN is one of the few portable ventilators to achieve the rigorous critical care standard for safety and accuracy.* The ventilator provides invasive, noninvasive, and mouthpiece ventilation and delivers a comprehensive set of modes and settings to meet patient needs.

OXYGEN

6 L/min Equivalent Internal Oxygen Concentrator

The VOCSN internal oxygen concentrator and Oxygen Direct™ system deliver the equivalent of 6 L/min of oxygen or up to 40% FiO2. External high pressure and low pressure oxygen sources can be connected when needed.

COUGH

Touch Button Cough™

Touch Button Cough therapy is activated in seconds rather than minutes, without changing the circuit. Breath Sync monitors patient breathing and triggers a cough at a natural point in the breathing cycle.

SUCTION

Hospital Grade Suction

Hospital grade suction system provides consistent high flows throughout the entire suction experience. VOCSN Suction therapy is up to three times quieter than traditional portable suction machines.

NEBULIZER

High Performance Nebulizer

VOCSN automatically compensates for the airflow from the nebulizer drive to ensure accurate ventilation and comfortable breathing. VOCSN records each medication use and turns off the nebulizer when the therapy is complete.

Benefits of Integration

SIMPLE

- Ventec One-Circuit™
- Intuitive touchscreen operation
- Quick and easy setup

1

device to learn
device to clean
alarm to silence

MOBILE

- Five therapies in one device
- 70% lighter and smaller than five devices
- Up to 9 hours of on-board battery

1

device to transport
device to charge
power supply to carry

CARE CHANGING

- Touch Button Cough™
- Uninterrupted ventilation between therapies
- Designed to reduce risk of circuit misconnects

1

circuit for all therapies
touch to operate
device to monitor

Ventec One-Circuit™

Ventec One-Circuit allows switching between therapies with the touch of a button. The redesigned valves make Touch Button Cough™ therapy possible and the integrated oxygen tube enables Oxygen Direct™. Rather than several cumbersome tubes connecting to separate devices, the Ventec One-Circuit eliminates clutter to create one easy-to-manage system for peace of mind.

Ventec Clinical Support

Every VOCSN comes with personalized on-site support from the Ventec Team

Setup

We partner with your team to set up VOCSN and help you knowledgeably transition patients.

Monitor

We can provide 24-hour on-site clinical support during your first 72 hours with patients.

Train

We personally train every member of your team to use each VOCSN therapy.

Support

Ventec Customer Support with experienced doctors, respiratory therapists, and engineers is just a phone call away.

Ventilation + Cough

VOCSN-VC configuration features Ventilation and Cough Therapy with the ability to use external high pressure and low pressure oxygen sources. This configuration is four pounds lighter than the five-therapy VOCSN configuration and uses the same Ventec One-Circuit™ allowing patients to use a single circuit for ventilation and cough without disconnecting between therapies.
